J. Bacteriol, 174:6981-6991(1992),

-i. FUNCTION: TOGETHER WITH FLAVODOXIN IS INVOLVED IN THE REDUCTIVE ACTIVATION OF COBALAMIN-INDEPENDENT METHIONINE SYNTHASE, PYRUVATE FORMATE LYASE AND ANAEROBIC RIBONUCLEOTIDE REDUCTASE. ALSO PROTECTS AGAINST SUPEROXIDE RADICALS DUE TO METHYL VIOLOGEN IN THE PRESENCE OF OXYGEN (BY SIMILARITY).

-i. CATALYTIC ACTIVITY: REDUCED FERREDOXIN + NADP(+) - OXIDIZED FERREDOXIN + NADPH.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               (Kel. 37, Last annotation update) FERREDOXIN-NADP REDUCTASE (EC 1.18.1.2) (FNR) (FLXR) (METHYL VIOLOGEN RESISTANCE PROTEIN A) (FLX.)

ACTA 1183:207-209(1993).

I: FUNCTION: FTR IS A (4FE-46] PROTEIN PLAYING A CENTRAL ROLE IN THE FERREDOXIN/THIOREDOXIN REGULATIORY CHAIN. IT CONVERTS AN ELECTRON SIGNAL (PHOTOREDUCED FERREDOXIN) TO A THIOL SIGNAL (REDUCED THIOREDOXIN) IN THE REGULATION OF EXPECTION OF SPECIFIC DISULFIDE GROUPS. CATALYZES THE LIGHT-DEPENDENT ACTIVATION OF SPECIFIC SUBUNIT: HETERODIMER OF SUBUNIT A (VARIABLE SUBUNIT) AND SUBUNIT B (CATALYTIC SUBUNIT).

B (CATALYTIC SUBUNIT).

MUSCIE GROWTH.

INTELLIFIE LINKED (BY SIMILARITY).

I DEVELOPMENTAL STACE: WIDELY EXPRESSED THROUGHOUT DEVELOPMENT.

LOW LEVELS ARE FOUND UP TO DAY 29 EMBRYOS. LEVELS INCREASE FROM

DAY 31 UP UNTIL LATE GESTATION.

I TISSUE SPECIFICITY: SPECIFICALLY EXPRESSED IN DEVELOPING AND ADULT

SKELETAL MUSCLE. HIGHEST LEVELS FOUND IN THE HINDLIMB MUSCLES

M. SEMIMEMBRANOSUS AND M. BICEPS FEMORIS; LOW LEVELS IN OTHER

HINDLIMB MUSCLES.

IDISEASE: DEFECTS IN ORD RAE THE CAUSE OF THE DOUBLE-MUSCLE

PHENOTYPE OR MUSCULAR HYPERTROPHY (MH), AN AUTOSOMAL RECESSIVE

DISEASE: DEFECTS. THIS DISEASE IS CHARACTERIZED BY AN INCREASED

NUMBER OF MUSCULE FIBERS (HYPERTROPHY), RESULTING IN AN INCREASED

NUMBER OF MUSCULE FIBERS (HYPERTRADIA), RESULTING IN AN INCREASE IN

MUSCLE MASS OF 20-25%.

                                                                                                                                                                                                                                        Microbiol.
TYME: the HPT kinase/phosphatase.";

(. Microbiol. 31:59-56(1999).

FUNCTION: THIS KINASE/PHOSPHATASE REGULATES CARBOHYDRATE UPTAKE AND METABOLISM BY PHOSPHORYLATING/DEPHOSPHORYLATING SER-45 OF THE PHOSPHORYL CARRIER PROTEIN (HPR) OF THE PHOSPHORYLATE DEPENDENT SUGAR PHOSPHOTRANSPERASE SYSTEM (PTS) IN RESPONSE TO CYTOPLASMIC METABOLITE LEVELS AS A DEVICE FOR THE MODULATION OF CARBON CARBON CARBON CARBON CARBON CARBON CARBON CALCULATION: ALLOSTERICALLY ACTIVATED BY METAPOLITE REPESSION.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             MQFPHPGPAA APAVGVPLYA

"Deciphering the biology of Mycobacterium tuberculosis from the
complete genome sequence.",
nature 393:537-544(1998).
-i- FUNCTION: CATALIZES THE 1,3-ALLYLIC REARRANGEMENT OF THE
HOMOALLYLIC SUBSTRATE ISOPENTENYL (IPP) TO ITS ALLYLIC ISOMER,
DIMETHYLALLYL DIPHOSPHATE (DMAPP) (BY SIMILARITY).
-i- CATALIZE T. SOPENTENYL DIPHOSPHATE - DIMETHYLALLYL
DIPHOSPHATE.
"Sequence analysis of the GntII (subsidiary) system for gluconate metabolism reveals a novel pathway for L-idonic acid catabolism in Escherichia coll.";

Jacteriol. 180:3704-3710(1998).

-i- FUNCTION: IDN OPERON REGULATOR. MAY REPRESS GNTKU AND GNTT GENUMEN GROWING ON L-IDONATE.

Microbiology 141:205-2015(1996).

-! CATALYTIC ACTIVITY: 2-DEOXY-D-GLUCONATE + NAD(+) = 3-DEHYDRO-2-DEOXY-D-GLUCONATE + NADH.

-! DEOXY-D-GLUCONATE + NADH.
-! PATHWAY: PECTIN DEGRADATION.
-! SIMILARITY: BELONGS TO THE SHORT-CHAIN DEHYDROGENASES/REDUCTASES
-FAMILY (SDR).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              DOMAIN
